SUMMARY

Product Designer with 3 years as a sole designer on mobile and web enterprise AI products, from problem framing through to production-ready UI. I have shipped AI products to real users including an ops assistant that cut engineering callouts by 22% and an AI styling platform that reduced product discovery page drop off by 10%, having worked with innovation teams and early-stage and emerging technology challenges. I translate ambiguous business challenges into polished, production-ready interfaces, grounded in user research and iterative feedback.

EXPERIENCE

UX Designer

Capgemini

📅 10/2023 - Present

- **Sole designer** across engagements, working daily with product managers and engineers from **problem definition through wireframes, flows, and production-ready mobile and web UI**, including sitting with engineers through build to hold visual quality in the shipped product.
- **Created and managed user-centric design systems** in Figma for multiple products, incorporating **component libraries and reusable patterns** to ensure design consistency and facilitate a **seamless design-to-developer handoff in alignment with WCAG 2.1**.
- **Redesigned the consumer product discovery** funnel from a static catalog into an intent-driven browse experience that simplified browsing experience, **reducing choice overload and cutting product-page drop-off 10%** across a 500-customer pilot.
- **Designed a Gen AI troubleshooting assistant** for non-technical store managers diagnosing equipment faults, replacing manual document search with a guided step by step flow, **cutting engineering call-outs by 22% and saving £2Mn in costs across a 40 store pilot**.
- **Proactively redesigned the returns flow** to introduce a **resale alternative**, surfacing a flash-deal match to a nearby buyer with similar size and style preferences instead of defaulting to a warehouse return, **reducing reverse logistics costs by ~30%**.
- Worked alongside engineering through implementation in Agile/ Scrum, co-wrote user stories, defined acceptance criteria, and reviewed builds against specs so shipped UI matched design intent.
- Presented concepts and solutions to CXO stakeholders for validation.

Design Innovator

TCS - Digital Impact Square

📅 01/2023 - 07/2023

Internship

- Translated insights from 20+ stakeholder interviews into information architecture, sitemaps, and task flows and designed a **multi-user agricultural marketplace** connecting farmers, agents and traders, with three distinct user roles and separate flows for each.

UX Design Intern

Capgemini

📅 06/2022 - 10/2022

Internship

- Designed wireframes, interaction flows, and high-fidelity prototypes in Figma for a web tool exploring UN SDGs, ensuring responsiveness and developer-handoff readiness.

Textile Designer

Ginza Industries Ltd., Cotton Cottage India Pvt. Ltd

📅 2018 - 2020

- Designed print and surface collections to seasonal trend directions, working within brand and buyer guidelines, providing foundation in colour, pattern, composition and visual consistency.

PROJECTS

Samsung R&D | Live NDA Project

📅 12/2022

- Conducted **UX research and stakeholder interviews** to identify usability issues and suggest design interventions for internal digital platforms

Lumiere Business Solutions

📅 06/2022 - 12/2022

- Conducted **5+ short-term UX research engagements**, synthesizing findings into user personas and journey maps that informed accessible, user-centered design improvements

SKILLS

Research and Validation

User Research, Stakeholder Interviews, Usability Testing, Personas, User Journeys, Competitor Benchmarking

UX Design

Web and Mobile UX, Design Systems, Component Libraries, Design Tokens, Visual Consistency, Accessibility (WCAG 2.1), Problem Framing, Information Architecture, User Flows, Wireframes, High-Fidelity & Interactive Prototypes, Interaction Design, Responsive Design, Information Hierarchy, Typography, Guided AI flows, Conversational Interfaces, Prompt Informed UX

Tools

Figma, Adobe Creative Suite, Illustrator, Sketch, Framer, Miro, Claude Design, Figma Make, Lovable, AntigraVity, Perplexity,

Soft Skills

Workshop Facilitation, Cross-Functional Collaboration, Stakeholder Communication

EDUCATION

Masters of Design, Design Management

MIT Institute of Design

📅 2021 - 2023

Bachelors of Design, Textile Design

NIFT, Mumbai

📅 2014 - 2018

CERTIFICATIONS

Google UX Design Professional Certificate

Coursera - [Link](#)
